Art Unit: 3744

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 4-6, 8, 9, 14-17, 21, and 22 are rejected under 35 U.S.C. 112; first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The recitation of the machine including an ice cream input and an inclusions input is not clearly shown or described. The drawings, especially Figs. 3-9, are of such a poor quality that it is difficult to understand the specification and claims.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levine in view of Hunt. Levine discloses the claimed invention except for the speed control allowing the motor to be ramped up. Hunt teaches a blender which has a continuously variable speed control for the motor. See especially column 2, lines 35-40. Thus, the speed control of Hunt inherently ramps up the speed of the motor. It would be

Art Unit: 3744

obvious to modify Levine so that the speed control ramps up the speed of the motor, in view of Hunt, for the purpose of providing more precise control of the motor.

5. Claims 4-6, 9, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levine in view of Patent No. 3,928,646 assigned to Cannell Auto-Process Corporation, hereafter referred to as Cannell. Levine discloses the claimed invention except for the separate inlets for the ice cream and inclusions. Cannell teaches a mixer having separate inlets 20 for the main ingredient and 11 for the inclusions. It would be obvious to provide Levine with separate inlets for the ice cream mix and inclusions, in view of Cannell, for the purpose of providing distinct inlets for the different ingredients.

6. Claims 8, 15-17, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levine in view of Cannell as applied to claim 4 or 14 above, and further in view of Hunt as applied to claim 1 above.

7. Claims 7, 10-13 and 23 are allowed.

8. Applicant's arguments with respect to claims 1-6, 8, 9, 14-17, 21, and 22 have been considered but are moot in view of the new ground(s) of rejection.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3744

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
